

Capacity 50m3 Portable Gasoline Station Cuboid Tank Container Refueling Station

Our Product Introduction

For more products please visit us on refueling-equipment.com

Basic Information

- Place of Origin: China
- Brand Name: Virette
- Model Number: A1

Product Specification

- Flow Rate: 50m3/h
- Tank Length: 11600mm
- Tank Type: Horizontal
- Capacity: 50m3
- Tank Surface Treatment: Sandblasting, Painting
- Tank Thickness: 14mm
- Tank Accessories: Manhole Cover, Emergency Valve, Level Gauge, Discharge Valve
- Material: Carbon Steel
- Highlight: 50m3 portable gasoline station, portable gasoline station cuboid, cuboid tank container refueling station

Product Description

Carbon Steel Container Fuel Station in Cuboid Tank Shape with Level Gauge Accessories

Product Description:

The Container Fuel Station is made from high-quality Carbon Steel, ensuring durability and longevity. The tank thickness is 14mm, providing the necessary strength to withstand frequent use and transportation. Additionally, the tank surface is treated with sandblasting and painting, enhancing its resistance to rust and corrosion.

The Self-priming Pump is a powerful component of this Mobile Oil Supply Station, making it easy to dispense fuel wherever and whenever needed. The pump is designed to work with a variety of fuel types, including gasoline and diesel, providing users with versatility and flexibility in their fueling needs.

One of the most significant benefits of this Portable Fuel Supply Station is its portability. The Container Fuel Station is designed to be easily transported from one location to another, making it an ideal option for businesses that operate in remote locations or for those who need to move fuel supplies frequently.

Whether you are a construction company that needs to fuel equipment on remote job sites or a transportation company that requires a reliable source of fuel for your fleet, the Mobile Oil Supply Station is the perfect solution.

In addition to its portability, the Container Fuel Station is also designed to be easy to use. The self-priming pump is simple to operate, and the tank can be quickly and easily refilled when needed. This makes it an ideal option for businesses or individuals who need a reliable and convenient source of fuel.

Finally, the Customized color of the Container Fuel Station allows for branding and personalization, making it an ideal option for businesses that want to promote their brand while providing a necessary service.

In summary, the Portable Fuel Supply Station is a Mobile Oil Supply Station that is designed to provide businesses and individuals with a reliable and convenient way to transport and store fuel while on the move. Its durable Carbon Steel construction, Self-priming Pump, and easy-to-use design make it an ideal option for those who need a reliable and convenient source of fuel. Additionally, its Customized color option allows for branding and personalization, making it an excellent option for businesses that want to promote their brand while providing a necessary service.

Applications:

The product is highly versatile and can be used in a variety of applications. Here are some of the occasions and scenarios where Virette A1 can be utilized:

Construction sites: Virette A1 is perfect for providing fuel to construction equipment such as bulldozers, cranes, and excavators. Its skid-mounted design makes it easy to transport and install on site, while its sturdy carbon steel material ensures durability even in harsh conditions.

Mining operations: The Mobile Oil Supply Station is also ideal for mining sites where heavy machinery requires constant refueling. Its 14mm tank thickness guarantees safety and security while its manhole cover, emergency valve, level gauge, and discharge valve provide additional protection.

Remote areas: Virette A1's container gas station design makes it easy to transport and deploy to remote areas such as oil fields, military bases, and disaster zones. Its mobility and efficiency make it the perfect solution for emergency fuel supply.

Road construction: With a tank length of 11600mm, the Virette A1 can hold a substantial amount of fuel, making it an excellent choice for road construction projects. Its skid-mounted design allows for easy movement and placement along the construction site.

In conclusion, Virette A1 is a reliable and efficient skid-mounted fuel station that can cater to a wide range of fuel supply needs. Its versatility, durability, and mobility make it an excellent investment for any business or organization that requires a Mobile Oil Supply Station.

Customization:

Customize your Virette A1 container fuel station with our product customization services. Our container gas station is designed to be a reliable and cost-effective solution for your fuel distribution needs. Our Containerized Fuel Distribution Bases are built in China and come with the following features:

Brand Name: Virette

Model Number: A1

Place of Origin: China

Tank Accessories: Manhole Cover, Emergency Valve, Level Gauge, Discharge Valve

Tank Diameter: 2700mm

Tank Surface Treatment: Sandblasting, Painting

Color: Customized

Tank Type: Horizontal

With our product customization services, you can tailor your container fuel station to your specific needs. Choose your desired color and add any additional tank accessories you may require. We are committed to providing you with a fuel distribution solution that meets your unique needs.

Packing and Shipping:

Product Packaging:

Container Fuel Station

User manual

Security keys for access

Shipping:
